PROFESSIONAL SUMMARY

Motivated Computer Science Co-op student with professional experience building and shipping software that improves everyday business processes. Skilled in full-stack development, Python, JavaScript, databases, and cloud technologies, with a strong ability to turn business needs into practical, high-performance solutions.

EXPERIENCE

Mercury Mortgages Inc - Mississauga, ON

May 2026 - Aug 2026

Software Engineering Intern

- Developed and launched an internal invoice management tool supporting **30,000+** invoices every year, bringing documents from different emails into one application using FastAPI, Python, and PostgreSQL.
- Reduced document search and load times by **78%** from **5.0** seconds to **1.1** seconds by optimizing FastAPI endpoints and PostgreSQL queries to improve application performance and invoice requests.
- Automated invoice data input using AI-based document scanning to extract important invoice details, reducing the amount of data employees have to enter manually.
- Collaborated with the AP (accounts payable) team to gather requirements and iterate on the tool, adding features for invoice approvals, vendor management, and audit logs for sharp document tracking.

FMSS Engineering Club - Brampton, ON

Sept 2024 - Jun 2025

Full Stack Software Developer

- Developed a tool using Node.js, React, and MySQL, which permitted **25+** club members to register for events, track attendance, and manage participation through a shared centralized application.
- Improved data accuracy by adding validation through Python that reduced duplicate records by **33%**.
- Automated **5+** weekly attendance reports, reducing repetitive administrative work for club executives.

EDUCATION

University of Waterloo - Waterloo, ON

Sept 2025 - Apr 2030 (expected)

Honours Bachelor of Computer Science (Co-op)

- Relevant coursework: OOP, Data Structures & Algorithms, Computation, Probability, Linux

PROJECTS

[Agentigram](#) - Hack The North 2026 Sponsor Winner

- Built a developer tool that lets personal AI coding agents communicate through different computers, creating a more flexible, conflict-free local development experience when working in a team.
- Won Tether's Best Sovereign App sponsor track and placed top 12 for Warp's Best Developer Tool.

SKILLS

- Languages: Python, JavaScript/TypeScript, SQL, C++
- Technologies: React, Next.js, FastAPI, Node.js, PostgreSQL, Git, CI/CD, Cloud Technologies
